APER Narrative Summary – FFY2023

Please provide a BRIEF (one to two sentences each) summary of Work Program activities by Function below.

Function 1: Long-Range Planning and Implementation

The focus in function 1 this year was to keep my members informed and familiar with the goals and objectives of the current Regional Transportation Plan, and beginning the process of implementing updates for the SC RTP.

Function 2: Technical Support and Data Management

The majority of time in Function 2 was spent monitoring the budget, providing transportation information for funding opportunities to members, and as well as any additional review/changes to the Bylaws or the PPP.

Function 3: Project Development and Monitoring

One of the main objectives in this function was to educate my members on their project selection and its relationship with the SC RTP (and their own planning documents) as well as with the process of applying for projects following the program guides as well as the timeline set by NMDOT with opportunities for both federal and state (TPF) funding.

Function 4: Other Activities and Projects

I have participated in virtual and in person transportation conferences, webinars, and meetings, which allowed me to communicate with other transportation planners from across the country and the state of New Mexico. Sharing ideas that will definitely benefit the members of my region and statewide as well. I was also able to assist with the ICIP process for several of my member entities as well as research available funding opportunities for the LPAs in my region.

Function 5: General RTPO Support

During each regular SC RTPO meeting, a professional development opportunity is scheduled and presented to the members, along with supporting documentation to take back to their entities. The presentations usually pertained to information being passed from NMDOT (e.g., funding opportunities from DOT and other sources, program application information and deadlines, project/program updates... etc.).

Function 6: RTPO Administration

Activities in function 6 were geared towards assisting members in project identification and providing information and support in identifying the feasibility of their project ideas. Outreach efforts of the SC RTPO have been primarily focused on the SC RTP, disseminating information on potential funding opportunities. The rtpnm.org website continues to be maintained regularly in an effort to keep all relevant SC RTPO information available for our members and the public to access at their leisure.

SCRTPO Project Prioritization Process	
Step 1:	Project Feasibility Form (PFF): Project applications will be submitted in response to the "Call for Transportation Projects" issued by the NMDOT, and begins with the Project Feasibility Forms (PFFs). PFFs will be submitted directly to the SCRTPO program manager and then distributed to NMDOT, District staff, Regional Design staff, and RTPPO staff for review. A mandatory PFF consultation meeting will be held with the entity to discuss the project, and will result in a decision by the District Engineer or his/her designee on whether or not the project has been identified a feasible and should proceed further into the application process. RTPPO staff will also provide the entity with any addition assistance and/or information (including suggestions on alternative funding sources and technical assistance providers).
Step 2:	Project Prospectus Form (PPF): Projects that are approved to move forward will then need to submit a Project Prospectus Form (PPF) and other application documents depending on Federal funding program. These documents are again distributed to NMDOT, District staff, Regional Design staff, and RTPPO staff for review.
Step 3:	Project Applications: Based on NMDOT & District staff recommendations, entities then prepare project applications for submittal to the SCRTPO. The applications are reviewed by the SCRTPO Program Manager for completeness and then submitted to NMDOT for project selection.
Step 4:	Project Presentations: Projects application are presented by each individual entity at the SCRTPO quarterly meeting. At this meeting, the RTPPO Policy & Technical Committee members will evaluate each project and presentation, using the scoring criteria, and placed onto a prioritized list based on regional priorities identified with the South Central Regional Transportation Plan.
Step 5:	Regional Transportation Improvement Program Recommendations (RTIPR): Projects that were not selected for funding are placed on the draft RTIPR and presented to the SCRTPO Policy & Technical Committee at the next SCRTPO quarterly meeting for approval. Members are allowed to review project placement on the RTIPR for any final/additional recommendations if applicable. Once approved, the SCRTPO RTIPR is submitted to the NMDOT for incorporation into the Statewide Transportation Improvement Program (STIP).
Step 6:	ZIPPR: The SCRTPO and SWRTPPO are both located within NMDOT District 1. SCRTPO staff works collaboratively with SWRTPPO to create a Combined RTIPR that is then submitted to the District 1 office as a recommended list.
